

### Rent your hydraulics

With our rental solutions, you can count on the reliability and availability of your hydraulic equipment. We rent our advanced equipment for applications in onshore and offshore projects, including engineering and technical support anywhere in the world.

### Advantages

- Customised rental solutions, including engineering
- No high investments - clear overview of costs
- Storage, maintenance and certification included
- Worldwide service, 24/7

### Rental Equipment

- HydrauPack
- HydrauWinch
- HydrauSupport
- HydrauTool

## MOSE project Venice - Storm barrier installation

### Rental Equipment

- 14x HydrauWinch 80S: 4 x for lifting, 10 x for mooring
- 2x HydrauPack 200 + HydrauSupport 250C (Cooler) standard for hydraulic oil supply

### Engineering

- Design of the winches according to customers specifications
- Lay-out of piping for prefab in Yerseke
- Installation on location

### Systems

- Production of the HydrauWinch 80S

### Services

- Transport, installation and of the equipment and piping
- Maintenance on location during the project period of 1,5 year
- Demobilisation at the end of the project

## Hydraulic supply for offshore walk-to-work systems

### Rental Equipment

- HydrauPack 200 combined in 15ft frame with HydrauSupport 250C (Cooler)
- 2 x HydrauPack750+ combined per system

### Engineering

- Design of HydrauPacks in close cooperation with the customer

### Systems

- Production of all equipment

### Services

- Maintenance on location
- Worldwide support

### Advantages

- Redundancy by multiple HydrauPacks per system
- Large fleet available

## Synchronized winches for lowering and operating piling frame on seabed

### Rental Equipment

- HydrauPack 500
- 2 x HydrauWinch 80
- HydrauWinch 65
- Synchronize control for operating 3 winches with one joystick
- HydrauWinch U4PF (Umbilical winch) for operating under water cylinders
- HydrauPack 45 for hydraulic oil supply for underwater cylinders

### Engineering

- Programming of the synchronized operating system

### Services

- Installation, commissioning on location in Rostock
- Integration of the control system with the system of the customer
- Maintenance and adjustments during project
- Decommissioning

United Kingdom

Netherlands  
Belgium

Singapore
