

Situated directly on the important European north-south route, the E19 motorway, FRIGO Breda has a sound strategic location in its International Expedition Centre in Hazeldonk for the distribution of goods in the Netherlands, Belgium and France. In this respect, this location is situated right between the harbours of Rotterdam and Antwerp, thereby ensuring that many goods imported from outside Europe are stored here.

FRIGO Breda has:

- space for 24,000 pallets in frozen storage at temperatures from -18 °C to -28 °C;
- all permits, such as those for Customs and RVV (transit and bonded veterinary storage) to ensure optimum processing of the flow of goods;
- a HACCP certificate;
- a modern warehouse management system including barcode scanning and location tracking, thereby ensuring traceability and FIFO;
- EDI and e-mail;
- refrigerated shipping (+4°C) where trucks are loaded and unloaded, so that the refrigeration chain is not interrupted.

Every day, we prepare and process orders for various national and international companies, including order picking and arranging grouped loads, which are shipped to the Benelux, France, Spain and Germany.

With our team of qualified and motivated staff, and the most modern equipment, we are able to ensure optimum satisfaction of your requirements.

### **Address and route**

FRIGO Breda is situated directly on the E19 (Amsterdam – Paris) motorway half an hour's drive from both Rotterdam and Antwerp.
